Project Canis

Level of Difficulty

HOW TO MAKE A BRAID

Step 1 - Cut 3 Strips Out

Cut 3 strips of fabric, about 1 inch wide and 1 foot long.

Step 2 - Tie a knot on one end

Place the ends of the fabric together & tie a knot on one end

Step 3 - Braid the strips

Cross one side over the other & braid the fabric. You may want to hold the knotted end between your knees or tape it to a table

Step 4 - Tie off the other end

Once you have braided the strips together, tie off the last 2-3 inches at the end. You're finished!
