

# Project Canis

## How to make a plushie

3 Level of difficulty

### STEP 1 - Cut out the shape

Wash the fabric first, The initial fabric should be at least 12" X 12" or more. Use fabrics that do not rip easily. Cut out 2 pieces of fabric in the same shape. Leave 4 or more extra inches around the edges.

### STEP 2 - Cut small strips

Cut small strips along the edges of the shape. Make sure these strips are long enough to double tie & wide enough so they do not rip.

### STEP 3 - Begin tying

Double tie the strips together. Leave a small space untied.

### STEP 4 - Put in stuffing

Once you have tied most of the ends together, stuff the shape with extra fabric or scraps from making other toys.

### STEP 5 - Finish up

Finish tying of the rest of the strips. Now you are done!

**Warning: Please monitor your pet while toy is in use.**
